OUI Inc.'s Smart Eye Camera expands to Vietnam!

OUI Inc.'s VP of Global Business, Shintaro Nakayama, travelled to Vietnam to implement our Smart Eye Camera first-hand into clinics.

In April 2022, Shintaro Nakayama, Vice President of Global Business at OUI Inc., visited Vietnam to introduce our Smart Eye Camera directly into clinics.

We demonstrated ophthalmic screenings using the Smart Eye Camera at Hanoi Medical University, the largest national medical university in Vietnam, which has nearly 8,000 graduate doctors annually. The Optometrist Course (3-year course) was established roughly 5 years ago and produces nearly 70 optometrists per year.

It was settled that the University will be implementing our Smart Eye Camera into their classes from here on out.

Dr. Nguyen Duong, an ophthalmologist in Ho Chi Minh City, organized a study session on the Smart Eye Camera, with roughly 15 ophthalmologists and optometrists in attendance. We demonstrated a real-time remote examination between Vietnam and Japan through our app. They also showed interest in our fundus model images we presented.

This expansion into Vietnam proved fruitful as we implemented our Smart Eye Camera into 4 clinics, with more clinics to come!

We strive to continue implementing our Smart Eye Camera into different countries, including Vietnam!

Implemented clinics:

- Hanoi Medical University
- Dong Do Hospital
- Cao Thang Eye Clinic
- Jio Health Eye Clinic

LET'S COLLABORATE! FEEL FREE TO CONTACT US!

Through our Smart Eye Camera, OUI Inc.'s vision is to reduce blindness in the world by 50% by 2025 by delivering appropriate diagnoses to patients who have not been able to receive eyecare.

So far, we have conducted various pilot projects in more than 20 countries around the world, including Asia and Africa, in cooperation with local ophthalmologists, NGOs, medical institutions, and international organizations.

The internationally recognized CE marking is expected to further increase the recognition and confidence in the Smart Eye Camera, not only in the European market but also in Asia and Africa.

In our current corporate stage, the pilot projects are necessary to understand the obstacles of developing countries where our product may flourish to help the maximum number of people in need.

That is why we ask for help, offer for future collaboration from all of you, our possible partner, to get the Smart Eye Camera delivered all across the globe to get the proper diagnoses and treatment that all people deserve!
